

AUDI ENTERTAINMENT MOBILE

The Audi Entertainment mobile is the first tablet that has been developed for use in the vehicle - with high operating comfort while driving and standing. It carries the unique progressive design language of Audi and can be wireless and handy in the high-quality ambience integrate an Audi. A smartphone app for remote control offers ideal ease of use for all passengers. In addition to the existing features and apps numerous other connectivity options are available with which the entertainment offer can be expanded with smartphones or game consoles.
